## Vibration Meter Date Collector

# 振動計VM-369

**Transducer:**

Individually calibrated piezoelectric accelerometers(100mV/g+/-5%)

**Meas. Range:**

Acceleration:0.001-20.00g(RMS)  
Velocity:0.01-200.0mm/s(O-P)  
Displacement:0.1-2000 um(P-P)

**Frequency Range:**

Acceleration:10Hz to 1KHz  
500Hz to 10KHz in HP mode  
for bearing condition check  
Velocity:10Hz to 1KHz  
Displacement: 10Hz to 1KHz

**Display:**

LCD indicating measurement value and unit, low battery level, and sensor cable, updated once per second.

**Hold/Avg/PK.Hold:**

When PK. Hold on, the meter always keeps the maximal value until it is released, Avg/ Hold can help user to read the vibration value easily

**Accessories:**

Carry Case

Headphone

Download Cable

85mm Probe

## 高精度振動計VM-369 特點

- 輕薄短小
- 超長工作時數90小時
- 圖形化介面
- IP65防水外殼
- CE認證高精度
- 自動關機省電裝置
- USB2.0傳輸界面
- 2,000筆記憶體

**Accuracy:**

+/-5% of value +/-2 digits

**Operating Conditions:**

Temperature:0-50 C.  
Humidity: Below 90 % RH.

**Dimensions:**

70(H) x 80(W) x 32(D)mm.

**Weight:**

280g (including battery).

**AC Output:**

2V Peak FS for headphones or recordings.

**Power:**

Standard 9V battery, giving up to 120 hours continuous use.

**Accessories included:**

Accelerometer and cable, instruction manual, rare earth magnet, 9V battery, 85mm probe, carry case.

**Optional Accessories:**

Headphones(as electronic stethoscope)

**Power off:**

Auto power off after 1 minute
